

Parasight System Inc. Launches Sight5DX™: A Comprehensive Heartworm & Tick Panel for Canines & Felines

Lexington, KY – 5/21/25 – *Parasight System Inc.*, a leader in veterinary diagnostic innovation, is proud to announce the launch of **Sight5DX™**, a groundbreaking diagnostic panel designed for the rapid and accurate detection of bloodborne pathogens in both canines and felines.

Developed for use in Parasight's **All-in-One** analyzer and built utilizing their proprietary **FlowsightAI™** and **HemasightAI™** technologies, **Sight5DX™** combines cutting-edge artificial intelligence with high-resolution imaging to deliver unparalleled diagnostic precision directly at the point of care. This new panel is set to redefine how veterinarians detect and manage critical bloodborne pathogens in companion animals.

Sight5DX™: The Most Comprehensive Heartworm & Tick Panel Available

The **Sight5DX™** panel is the only automated in-clinic diagnostic heartworm test for canines that is Companion Animal Parasite Council (CAPC) & American Heartworm Society compliant! The **Sight5DX™** panel includes five essential tests:

- **Heartworm Microfilaria Test**
- **Heartworm Antigen Test**
- **Lyme Disease Test**
- **Ehrlichia Test**
- **Anaplasma Test**

With just a single blood sample, veterinarians can now screen for multiple life-threatening diseases with exceptional speed and sensitivity—saving valuable time during clinical decision-making.

“Our goal with **Sight5DX™** was to take the complexity out of diagnostics and empower veterinarians with fast, AI-driven insights,” said Eric Hauck, CEO of Parasight System Inc. “By integrating both FlowsightAI™ and HemasightAI™ technology, we’ve created a platform that doesn’t just detect disease—it elevates the standard of care for pets everywhere.”

AI-Powered Precision in Every Drop

Sight5DX™ utilizes HemasightAI™ to analyze live microfilaria, while FlowsightAI™ interprets antigen and antibody interactions — enabling unmatched accuracy in both detection and disease differentiation.

Designed for Veterinary Practices of All Sizes

Parasight's compact and user-friendly All-in-One analyzer empowers clinics to bring advanced diagnostics in-house. With the introduction of the new **Sight5DX™** panel, veterinary teams can now run comprehensive heartworm and tick-borne disease tests—receiving AI-verified results in just minutes. The **Sight5DX™** is a powerful new addition to Parasight's extensive diagnostic lineup and provides another valuable tool for veterinary practices.

Sight5DX™ is now available nationwide. To learn more or to schedule a demo, visit www.parasightsystem.com.

About Parasight System Inc.

Parasight System Inc. is an animal diagnostic technology company committed to delivering next-generation tools for veterinary professionals. By fusing artificial intelligence with advanced imaging systems, Parasight is transforming how parasites and pathogens are detected and managed—improving outcomes for pets and peace of mind for their owners.
