

Parasight System Inc Named Preferred Veterinary Diagnostic Provider for IAHA Members

Partnership brings advanced in-clinic diagnostic solutions and exclusive benefits to independent veterinary practices

LEXINGTON, Ky. — September 29, 2026 — Parasight System Inc, an innovator in veterinary diagnostic technology, today announced it has been named a preferred veterinary diagnostic provider for the Independent Animal Hospital Association (IAHA), serving IAHA's network of independent veterinary practices.

The partnership brings Parasight System's growing portfolio of in-clinic diagnostic solutions to IAHA members while providing participating practices access to partnership-specific benefits designed to support their clinical, operational, and financial goals.

"We are honored to partner with IAHA and to support the independent veterinary practices that are such an important part of our profession," said Eric Hauck, CEO of Parasight System Inc. "Independent veterinarians are continually being asked to deliver exceptional patient care while managing the many operational and financial challenges of running a practice. Our partnership with IAHA gives us an opportunity to help make advanced in-clinic diagnostics more accessible while supporting practices in their commitment to their patients, clients, and communities."

Expanding Access to In-Clinic Diagnostics

Parasight System's Complete Lab System is designed to bring a broad range of diagnostic capabilities directly into veterinary practices. The system currently includes fecal testing, hematology, chemistry, immunoassay, and urinalysis solutions, including the SightAI™ All-in-One Diagnostic Analyzer and additional InSight® analyzers.

By bringing diagnostics closer to the point of care, Parasight aims to help support more efficient clinical workflows. The company's mission is centered on "helping vets help pets" by developing user-friendly diagnostic technologies intended to improve animal health while supporting the efficiency and profitability of veterinary practices.

Benefits for IAHA Member Practices

IAHA's member-benefit model is built around partnering with industry providers to give independent hospitals access to programs and purchasing advantages that can help them compete in an increasingly challenging veterinary marketplace.

Through the partnership, IAHA member practices will have access to special pricing on Parasight System's in-clinic diagnostic solutions.

"IAHA is proud to welcome Parasight System as a preferred diagnostic partner," said Brent Dunbar, President of IAHA. "Our members are looking for solutions that can help them deliver

excellent medicine while also running sustainable independent practices. Parasight's focus on accessible, in-clinic diagnostics makes this partnership a natural fit for the needs of our members."

For Parasight, the partnership represents more than a business relationship. It reflects the company's commitment to supporting veterinary professionals and the independent practices that serve their communities.

About Parasight System Inc

Parasight System Inc is a veterinary diagnostic technology company headquartered in Lexington, Kentucky. The company develops innovative, user-friendly diagnostic solutions designed to bring advanced testing capabilities into veterinary practices.
