FOR IMMEDIATE RELEASE

Parasight System Inc Selected as Preferred Diagnostic Partner for Shelters United

SightAI™-powered Complete In-Clinic Lab System brings fast, accurate, in-house diagnostics to Shelters United's 2,300+ member animal welfare organizations

LEXINGTON, Ky., November 12, 2026 — Parasight System Inc, a Lexington-based leader in veterinary diagnostic solutions, today announced that it has been selected as the preferred diagnostic partner for Shelters United, the cooperative buying program dedicated exclusively to animal welfare organizations. Through the partnership, Shelters United members will have access to Parasight's Complete In-Clinic Lab System, a family of SightAI™-powered analyzers that brings hematology, chemistry, immunoassay, fecal and urine testing together into one in-house lab.

Shelters United, created alongside MWI Animal Health and INPEx, is a buying group of more than 2,300 shelters, rescues and other 501(c)(3) animal welfare organizations. Its programs, including a Vet Supplies Savings Program, a Pet Supplies Marketplace, the Shelters United Pharmacy and a Veterinarian of Record program, help members save money on veterinary products and supplies so they can care for and adopt out more healthy pets.

Shelter veterinary teams care for a high volume of animals, and sending samples to an outside lab means waiting on answers that guide treatment, surgery and adoption decisions. Parasight's Complete Lab System puts those answers in the clinic. Each analyzer is built for real clinical workflows, so shelter teams can test more animals, detect issues sooner, and treat only the animals that need it.

The Complete In-Clinic Lab System

SightAI™ All-in-One	Parasite Detection
InSight® V5R	Hematology
InSight® V-CHEM	Chemistry
InSight V-IA® *Plus*	Immunoassay
InSight® Urinalysis	Urine testing
InSight® Equine-IA	Equine Immunoassay

"Shelters and rescues are asked to do more with less every single day, and their veterinary teams deserve the same diagnostic tools as any full-service clinic," said Eric Hauck, CEO and co-founder of Parasight System Inc. "Being named Shelters United's preferred diagnostic partner lets us put a complete, in-house lab in the hands of the people caring for these animals, so they get answers they can

trust, when they need them, and more healthy pets go home."

Shelters United members can learn more and access member offers at sheltersunited.com. Organizations interested in Parasight's Complete Lab System can call 833-233-7278 or visit www.parasightsystem.com.

About Parasight System Inc

Parasight System Inc is a leader in innovative veterinary diagnostic solutions, dedicated to empowering clinics with accurate, efficient, in-clinic testing designed to support better clinical decisions and improved animal health outcomes. Its SightAI™-powered analyzers, including the All-in-One diagnostic system, InSight® V5R, InSight® V-CHEM, InSight V-IA® *Plus*, InSight® Equine-IA and InSight® Urinalysis, bring hematology, chemistry, immunoassay, fecal and urine testing together into one complete, in-house lab. Headquartered at 1532 N Limestone in Lexington, Kentucky, the company's mission is to revolutionize veterinary medicine by improving the health of pets and the operational efficiency and profitability of veterinary practices.
