

FOR IMMEDIATE RELEASE

Parasight System Inc. Launches Complimentary Microfilaria Testing Initiative for Heartworm Awareness Month

April 2026 Promotion Supports Veterinary Clinics with Training, Workflow Optimization, and Enhanced Diagnostic Capabilities

Parasight System Inc. is proud to announce a limited-time initiative in recognition of Heartworm Awareness Month this April 2026. Throughout the month, Parasight will offer **complimentary Microfilaria testing** to all current All-in-One (AIO) analyzer customers, reinforcing its commitment to advancing veterinary diagnostics and improving patient outcomes.

This exclusive April program provides veterinary clinics with the opportunity to enhance their diagnostic protocols while benefiting from no-cost Microfilaria testing. By leveraging the capabilities of the All-in-One analyzer, clinics can more efficiently detect heartworm-related infections and deliver timely, accurate care.

Notably, Parasight's All-in-One analyzer is **the only in-clinic diagnostic system that tests for Microfilaria**, helping clinics align with both Companion Animal Parasite Council (CAPC) and American Heartworm Society (AHS) guidelines for comprehensive heartworm screening.

"Heartworm disease remains a serious and potentially life-threatening condition for pets," said Eric Hauck, CEO at Parasight System Inc. "By offering complimentary Microfilaria testing during Heartworm Awareness Month, we aim to support clinics in elevating their diagnostic standards while also providing a valuable opportunity to train staff, optimize workflow, and fully experience the benefits of in-clinic testing."

Program Highlights:

- **Free Microfilaria testing** for all AIO customers throughout April 2026
- Limited-time initiative designed for **training, demonstration, and evaluation**
- Supports **staff onboarding and workflow optimization**
- Enables clinics to **experience the clinical value** of Microfilaria testing firsthand
- Helps practices align with **CAPC and AHS heartworm testing recommendations**
- Reinforces the importance of **year-round heartworm screening**

Parasight encourages all current AIO customers to participate by confirming their enrollment to ensure adequate test kit availability for the duration of the promotion.

Clinics that are not yet using the All-in-One analyzer are also invited to take advantage of this opportunity. Parasight System Inc. welcomes veterinary professionals to learn more about adopting the AIO platform and experiencing firsthand how advanced diagnostics can support better patient care.

“Better care starts with better diagnostics.”
